KEYSTONE TECHNOLOGIES

LEGACY DATA ARCHIVAL PROJECT PLAN

1 **Project Assessment** - reveals tailored legacy data tools based on individual customer needs.

2 **Design** - involves architecting secure, scalable infrastructure for efficient data retention.

3 **Extraction, Conversion & Transfer or Extraction and Transfer** - customer data for secure and compliant archival.

4 **Implementation** - consists of data validation, acceptance testing, customer branding, and customization.

5 **Training & Documentation** - utilize train-the-trainer with flexible timeframes and on-demand, independent learning resources.

6 **Activation, Go Live** - launch legacy data archival, ensuring seamless transition, data integrity, and system functionality for optimal performance.
